

Mini Orb Diffuser Manual

OPERATION STEPS

1. Place diffuser on a flat surface and plug the adapter into the back of the unit.

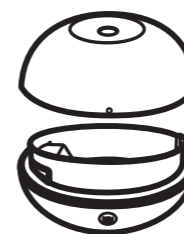

2. Open top cover and pour tap water into the water tank with measuring cup. Never exceed MAX water line.

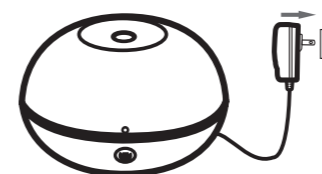

3. Add 2-3 drops of essential oils into water tank. Please note too much oil will damage the mist maker. Ensure there is water in the water tank before adding oils.

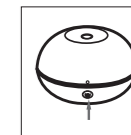

3. Close the top cover.

4. Plug in and turn the unit on.

DIRECTIONS FOR USE

Mist button

- Press the Power Button once to work in continuous mist mode. The LED light starts to change colour.
- Press the Power Button twice to work in continuous mist mode. The LED light is fixed on the colour you have selected.
- Press the Power Button 3 times to work in continuous mist mode. The LED light turns off.
- Press the unit 4 times to turn off.

Note: Unit will stop working automatically when water runs out.

If mist output is weak please follow the steps below:

1. Check water level. Add water to the water tank if required. Please remember not to exceed the max line.
2. Clean the bubble on the mist maker with a cotton bud. The mist maker is a small ceramic part in the middle of the water tank.

OPERATION WARNING

- Do not remove the cover or add water or essential oils when unit is operating. Turn it off first.
 - Add fresh tap water. The mist will be light initially and then increase to its normal level.
 - Put drops of essential oil in the water tank only.
 - Do not open the cover when the unit is in use.
 - Do not pour water over the max level.
 - Pour out the remaining water after each use to prevent bacteria from building up.
 - Keep the power cord area dry. Avoid touching it with wet hands or placing the unit on wet surfaces or in a wet environment.
 - Keep out of reach of children.
 - Do not use flammable items or toxic substances near the diffuser.
 - Use only natural plant based essential oils.
 - If you experience sensitivity or discomfort, refrain from use and consult your physician.
 - Ensure that the unit is placed in a stable area and on a flat surface to avoid water from spilling.
- If you have any questions, please contact us.

MAINTENANCE

1. After 3-4 days of use, follow steps below to clean the diffuser.
2. Before any cleaning operation, switch the unit off and unplug it.
3. Fill the water tank with two tablespoons of alcohol (Isopropyl alcohol). The alternatives are one tea spoon of citric acid, apple cider/white vinegar or fresh lemon juice.
4. Let it soak for 5 minutes.
5. Take a cotton bud and lightly clean the mist maker and around the tank.
6. Pour out the cleaning solution.
7. Wipe the oil residue from the tank with a soft cloth or paper towel.

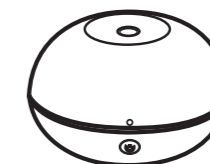

- The plastic liner of the outer cover can be gently pulled out and cleaned.
- Do not use detergent when cleaning the product.
- Keep it clean and dry when not in use to avoid bacteria and mildew(fungus) from building up.
- Never immerse the unit in water or let water enter the air outlet.
